Testing and Quality Services

Practical services designed to help textile teams evaluate product performance, manage quality risks, and make informed sourcing and production decisions.

Our Services

01 — Softlines Testing

Fabric composition, tensile behavior, seam strength, dimensional stability, and core performance validation.

02 — Chemical Safety

Support for restricted-substance screening, material-risk review, and chemical safety requirements.

03 — Colorfastness & Durability

Evaluation for laundering, rubbing, perspiration, crocking, wear, and everyday product performance.

04 — Flammability & Shrinkage

Safety and structural-integrity evaluation for textile categories where product performance is critical.

05 — Inspection & Auditing

Pre-production, inline, and pre-shipment inspections supporting product quality and shipment readiness.

06 — Expert Consultation

Method interpretation, corrective-action guidance, service selection, and testing-strategy support.
